25X1

1. Work on the construction of a power station at Berente about 17 km. northwest of Miskolc was begun in August 1952. The installation is scheduled to be equipped with 10 radiation boilers each rated at a capacity of 100 tons of steam pressure per hour. By November 1954, one of the boilers was installed and the erecting of two other boilers was 90 percent completed. It was expected that the power station would not be completed before another three years.
2. German firms participating in construction and erecting work for the power station include VEB Bergmann-Borsig at Berlin-Wilhelmsruh which dispatched 60 fitters and Engineer Keil (fnu); VEB Rohrleitungs- und Apparatenbau (pipeline and apparatus construction) at Finow which sent about 15 fitters; VEB Kessel- und Apparatenbau (boiler and apparatus construction firm) at Rathenow which sent 4 or 5 fitters; VEB Stahlbau, previously Mannesmann, at Leipzig which sent about 40 fitters; VEB Kranbau (crane-construction firm) at Eberswalde which sent 2 or 3 erectors; Spezialbau Leipzig which dispatched 20 erectors; and the Mechanik-Askania Works at Berlin-Treptow which sent 4 or 5 fitters.
